Philippines Branch**

Financial Statements  
December 31, 2022 and 2021

and

Independent Auditor's Report

## INDEPENDENT AUDITOR'S REPORT

The Board of Directors and Stockholders  
STARR International Insurance Philippines Branch

### Report on the Audit of the Financial Statements

#### Opinion

We have audited the financial statements of STARR International Insurance Philippines Branch (the Branch), which comprise the statements of financial position as at December 31, 2022 and 2021, and statements of comprehensive income, statements of changes in home office account and statements of cash flows for the years then ended, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Branch as at December 31, 2022 and 2021, and its financial performance and its cash flows for the years then ended in accordance with Philippine Financial Reporting Standards (PFRSs).

#### Basis for Opinion

We conducted our audits in accordance with Philippine Standards on Auditing (PSAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Branch in accordance with the Code of Ethics for Professional Accountants in the Philippines (Code of Ethics) together with the ethical requirements that are relevant to our audit of the financial statements in the Philippines, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with PFRSs, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Branch's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Branch or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Branch's financial reporting process.

## **Auditor's Responsibilities for the Audit of the Financial Statements**

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with PSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with PSAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Branch's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Branch's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Branch to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

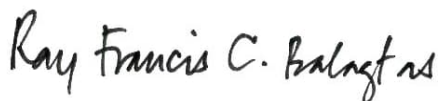

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

**Report on the Supplementary Information Required Under Revenue Regulations 34-2020 and 15-2010**

Our audits were conducted for the purpose of forming an opinion on the basic financial statements taken as a whole. The supplementary information required under Revenue Regulations 34-2020 and 15-2010 in Note 27 to the financial statements is presented for purposes of filing with the Bureau of Internal Revenue and is not a required part of the basic financial statements. Such information is the responsibility of the management of STARR International Insurance Philippines Branch. The information has been subjected to the auditing procedures applied in our audit of the basic financial statements. In our opinion, the information is fairly stated, in all material respects, in relation to the basic financial statements taken as a whole.

# **STARR INTERNATIONAL INSURANCE PHILIPPINES BRANCH**

---

## **NOTES TO FINANCIAL STATEMENTS**

---

### **1. Corporate Information**

STARR International Insurance Philippines Branch (the Branch) is the established branch office in the Philippines of Starr International Insurance (Asia) Limited (the Home Office). The Home Office is a subsidiary of Starr Insurance & Reinsurance Limited which is a Bermuda-based insurance and reinsurance company with a portfolio of insurance and reinsurance products and clients throughout North America, Europe and Latin/South America.

The Home Office was licensed by the Philippine Securities and Exchange Commission (SEC) on April 19, 2013 to establish its branch office in the Philippines under the name of STARR International Insurance Philippines Branch. Its objective is to engage in non-life insurance business by providing non-life insurance products, to include both commercial and personal product lines. The Home Office was duly licensed by the Insurance Commission (IC) on May 8, 2013 after complying with the minimum requirements set by IC.

The principal office address of the Branch is Unit 5, 23<sup>rd</sup> Floor, Tower 2, The Enterprise Center, 6766 Ayala Ave. cor. Paseo de Roxas Ave., Makati.

The accompanying financial statements were approved and authorized for issuance by the Board of Directors (BOD) on April 28, 2023.

---

### **2. Basis of Preparation and Statement of Compliance**

#### Basis of Preparation

The financial statements of the Branch have been prepared in accordance with Philippine Financial Reporting Standards (PFRS).

The accompanying financial statements have been prepared on a historical cost basis, except for debt and equity financial assets that have been measured at fair value.

The financial statements provide comparative information in respect of the previous period.

#### Statement of Compliance

The financial statements of the Branch have been prepared in compliance with Philippine Financial Reporting Standards (PFRS).

#### Presentation of Financial Statements

The Branch presents its statements of financial position in order of liquidity. An analysis regarding recovery of assets or settlement of liabilities within twelve (12) months after the statement of financial position date (current) and more than 12 months after the statement of financial position date (non-current) is presented in Note 26.

Financial assets and financial liabilities are offset and the net amount reported in the statement of financial position only when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the assets and settle the liability simultaneously. The Branch assesses that it has a currently enforceable right of offset if the right is not contingent on a future event, and is legally enforceable in the normal course of business, event of default, and event of solvency or bankruptcy of the Branch and all of the counterparties.

Income and expenses are not offset in the statement of income unless required or permitted by any accounting standard or interpretation, and as specifically disclosed in the accounting policies of the Branch.

#### Changes in Accounting Policies and Disclosures

The accounting policies adopted are consistent with those of the previous financial year except for the adoption of the following amendments and improvements to PFRSs which became effective on January 1, 2022. The Branch did not early adopt any other standard, interpretation or amendment that has been issued but is not yet effective. Unless otherwise indicated, these new and revised accounting standards did not have an impact on the Branch's financial statements.

- Amendments to PFRS 3, *Reference to the Conceptual Framework*
- Amendments to PAS 16, *Plant and Equipment: Proceeds before Intended Use*
- Amendments to PAS 37, *Onerous Contracts – Costs of Fulfilling a Contract*
- *Annual Improvements to PFRSs 2018-2020 Cycle*
  - Amendments to PFRS 1, *First-time Adoption of Philippines Financial Reporting Standards, Subsidiary as a first-time adopter*
  - Amendments to PFRS 9, *Financial Instruments, Fees in the '10 per cent' test for derecognition of financial liabilities*
  - Amendments to PAS 41, *Agriculture, Taxation in fair value measurements*

#### Standards issued but not yet effective

Pronouncements issued but not yet effective are listed below. Unless otherwise indicated, adoption of these pronouncements is not expected to have a significant impact on the Branch's financial statements. The Branch intends to adopt the following pronouncements when they become effective.

Effective beginning on or after January 1, 2023

- Amendments to PAS 1 and PFRS Practice Statement 2, *Disclosure of Accounting Policies*
- Amendments to PAS 8, *Definition of Accounting Estimates*
- Amendments to PAS 12, *Deferred Tax related to Assets and Liabilities arising from a Single Transaction*

Effective beginning on or after January 1, 2024

- Amendments to PAS 1, *Classification of Liabilities as Current or Non-current*
- Amendments to PFRS 16, *Lease Liability in a Sale and Leaseback*

Effective beginning on or after January 1, 2025

- PFRS 17, *Insurance Contracts*

PFRS 17 is a comprehensive new accounting standard for insurance contracts covering recognition and measurement, presentation and disclosure. Once effective, PFRS 17 will replace PFRS 4, *Insurance Contracts*. This new standard on insurance contracts applies to all types of insurance contracts (i.e., life, non-life, direct insurance and re-insurance), regardless of the type of entities that issue them, as well as to certain guarantees and financial instruments with discretionary participation features. A few scope exceptions will apply.

The overall objective of PFRS 17 is to provide an accounting model for insurance contracts that is more useful and consistent for insurers. In contrast to the requirements in PFRS 4, which are largely based on grandfathering previous local accounting policies, PFRS 17 provides a

comprehensive model for insurance contracts, covering all relevant accounting aspects. The core of PFRS 17 is the general model, supplemented by:

- A specific adaptation for contracts with direct participation features (the variable fee approach)
- A simplified approach (the premium allocation approach) mainly for short-duration contracts

PFRS 17 is effective for reporting periods beginning on or after January 1, 2023, with comparative figures required. Early application is permitted.

The Branch has been performing an impact assessment of the new standard. The Branch expects that the new standard will result in a significant change to its accounting policies for insurance contract liabilities and is likely to have a significant impact on profit and total equity together with the presentation and disclosure. Initial financial impact assessment using the 2019 audited financial statements determined that there were no onerous contracts identified. There was also an insignificant impact on profit and total equity together with the presentation and disclosure.

#### Deferred effectivity

- Amendments to PFRS 10, *Consolidated Financial Statements*, and PAS 28, *Sale or Contribution of Assets between an Investor and its Associate or Joint Venture*

#### Fair Value

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible to by the Branch.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. A fair value measurement of a nonfinancial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

#### *Fair value hierarchy*

The Branch uses the following hierarchy for determining and disclosing the fair values of financial instruments by valuation technique:

- Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities
- Level 2: other techniques for which all inputs which have a significant effect on the recorded fair value are observable in the market, either directly or indirectly
- Level 3: techniques which uses inputs which have a significant effect on the recorded fair value that are not based on observable market data.

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Branch determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

At each reporting date, management analyzes the movements in the values of assets and liabilities which are required to be re-measured or re-assessed as per the Branch's accounting policies. For this analysis, management verifies the major inputs applied in the latest valuation by agreeing the information in the valuation computation to contracts and other relevant documents with relevant external sources to determine whether the change is reasonable.

For the purpose of fair value disclosures, the Branch has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

#### *Financial assets*

The fair value for financial instruments traded in active markets at the end of the reporting period is based on their quoted market price or dealer price quotations (price between the bid and ask spread), without any deduction for transaction costs. When current market prices are not available, the price of the most recent transaction provides evidence of the current fair value as long as there has not been a significant change in economic circumstances since the time of the transaction. For all other financial instruments not listed in an active market, the fair value is determined by using appropriate valuation techniques. Valuation techniques include net present value techniques, comparison to similar instruments for which market observable prices exist, option pricing models, and other relevant valuation models.

#### *Non-financial assets*

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

#### Cash

Cash includes cash on hand and in bank. Cash is carried in the statement of financial position at face amount. Cash in bank earns interest at the prevailing bank deposit rates.

#### Short-term Investments

Short-term investments are short-term, highly liquid investments that are readily convertible to known amounts of cash with original maturities of more than three months but less than one year from dates of placement. These earn interests at the respective short-term investment rates.

#### Insurance Receivables

Insurance receivables are recognized on policy inception dates and measured on initial recognition at the fair value of the consideration receivable for the period of coverage. The carrying value of insurance receivables is reviewed for impairment whenever events or circumstances indicate that the carrying amount may not be recoverable, with the impairment loss recorded in the profit and loss. Insurance receivables are derecognized following the derecognition criteria of financial assets.

#### Financial Instruments

##### *Qualifying for temporary exemption from PFRS 9*

The Branch applied the temporary exemption from PFRS 9 as permitted by the Amendments to PFRS 4 Applying PFRS 9 *Financial Instruments with PFRS 4 Insurance Contracts* issued in September 2016. The temporary exemption permits entities whose activities are predominantly

connected with insurance to continue applying PAS 39 rather than PFRS 9 for annual periods beginning before January 1, 2025 in line with the effectivity of PFRS 17.

The assessment for whether a reporting entity's activities are predominantly connected with insurance is based on the liabilities connected with insurance in proportion to the entity's total liabilities. An entity may elect the temporary exemption if, and only if:

- The carrying amount of its liabilities arising from contracts within the scope of PFRS 4 is significant compared to the total carrying amount of all its liabilities; and
- The percentage of the total carrying amount of its liabilities connected with insurance relative to the total carrying amount of all of its liabilities is:
  - Greater than 90 percent; or
  - Less than or equal to 90 percent but greater than 80 percent, and the insurer does not engage in a significant activity unconnected with insurance.

The predominance assessment is performed using the carrying amounts of liabilities reported on the statement of financial position at the annual reporting date December 31, 2015 and before December 31, 2020. Applying the requirements, the Branch performed the predominance assessment using the Branch's statement of financial position as of December 31, 2015.

The Branch concluded that it qualified for the temporary exemption from PFRS 9 because its activities are predominantly connected with insurance. As at December 31, 2015, the Branch's gross liabilities arising from contracts within the scope of PFRS 4 represented 88% of the total carrying amount of all its liabilities, and the Branch did not engage into any significant activities not connected with insurance. Since December 31, 2015, there has been no change in the activities of the Branch that requires reassessment of the use of the temporary exemption.

#### *Date of recognition*

Financial instruments are recognized in the statement of financial position when the Branch becomes a party to the contractual provisions of the instrument. Purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace are recognized on the trade date.

#### *Initial recognition*

Financial instruments are recognized initially at fair value. Except for financial instruments at fair value through profit or loss (FVPL), the initial measurement of financial assets includes transaction costs. The Branch classifies its financial assets in the following categories: financial assets at FVPL, AFS financial assets, held-to-maturity (HTM) investments and loans and receivables. The Branch classifies its financial liabilities into financial liabilities at FVPL and other financial liabilities. The classification depends on the purpose for which the investments were acquired or liabilities incurred and whether they are quoted in an active market. Management determines the classification of its investments at initial recognition and, where allowed and appropriate, re-evaluates such designation at every reporting date.

As of December 31, 2022 and 2021, the Branch has no financial instruments at FVPL.

#### *Day 1 difference*

Where the transaction price in a non-active market is different from the fair value from other observable current market transactions in the same instrument or based on a valuation technique whose variables include only data from observable market, the Branch recognizes the difference between the transaction price and fair value (a 'Day 1' profit or loss) in profit or loss unless it

qualifies for recognition as some other type of asset. In cases where an unobservable data is used, the difference between the transaction price and model value is only recognized in profit or loss when the inputs become observable or when the instrument is derecognized. For each transaction, the Branch determines the appropriate method of recognizing the 'Day 1' profit or loss amount.

#### *Loans and receivables*

Loans and receivables are financial assets with fixed or determinable payments and fixed maturities that are not quoted in an active market. They are not entered into with the intention of immediate or short-term resale and are not classified as other financial assets held for trading, designated as AFS or financial assets designated at FVPL.

After initial measurement, the loans and receivables are subsequently measured at amortized cost using the EIR method, less allowance for impairment. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees that are an integral part of the EIR.

As of December 31, 2022 and 2021, the Branch's loans and receivables include "Cash in bank", "Cash equivalents, Accrued income and Loans and deposits.

#### *AFS financial assets*

AFS financial assets are those non-derivative investments which are designated as such or do not qualify to be classified as designated as financial assets or financial liabilities at FVPL, HTM or loans and receivables. They are purchased and held indefinitely, and may be sold in response to liquidity requirements or changes in market conditions. They include government securities, equity investments, and other debt instruments.

After initial measurement, AFS financial assets are subsequently measured at fair value. The effective yield component of AFS debt securities, as well as the impact of restatement on foreign currency-denominated AFS debt securities, is reported in profit or loss. Interest earned on holding AFS financial assets are reported as interest income using the effective interest rate (EIR). The unrealized gains and losses arising from the fair valuation of AFS financial assets are reported in OCI. The losses arising from impairment of such investments are recognized as provisions on impairment losses in profit or loss. When the security is disposed of, the cumulative gain or loss previously recognized in OCI is recognized as realized gains in profit or loss.

#### *Held-to-maturity investments*

HTM investments are quoted non-derivative financial assets with fixed or determinable payments and fixed maturities for which management has the positive intention and ability to hold to maturity. Where the Branch sells other than an insignificant amount of HTM investments, the entire category would be tainted and reclassified as AFS financial assets. After initial measurement these investments are subsequently measured at amortized cost using the effective interest method, less any impairment in value. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees that are an integral part of the effective interest rate. Gains and losses are recognized in income when the HTM investments are derecognized and impaired, as well as through the amortization process. The losses arising from impairment of such investments are recognized in the statement of income. The effects of restatement on foreign currency-denominated HTM investments are recognized in the statement of income.

#### *Other financial liabilities*

Issued financial instruments or their components, which are not designated at FVPL are classified as other financial liabilities where the substance of the contractual arrangement results in the Branch having an obligation either to deliver cash or another financial asset to the holder, or to satisfy the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed

number of own equity shares. The components of issued financial instruments that contain both liability and equity elements are accounted for separately, with the equity component being assigned the residual amount after deducting from the instrument as a whole the amount separately determined as the fair value of the liability component on the date of issue.

After initial measurement, other financial liabilities are subsequently measured at amortized cost using the EIR method. Amortized cost is calculated by taking into account any discount or premium on the issue and fees that are an integral part of the EIR. Any effects of restatement of foreign currency-denominated liabilities are recognized in profit or loss.

This accounting policy applies primarily to the Branch's insurance contract liabilities, insurance payables, accounts payable and accrued expenses that meet the above definition (other than liabilities covered by other accounting standards, such as pension liability and income tax payable).

#### Reclassification of financial assets

An investment will be reclassified as AFS assets if, as a result of the change in intention or ability, it fails to meet the requirements for classification as HTM investment. If the tainting provisions are triggered, any remaining HTM investments should also be reclassified as AFS assets. Similarly, if as a result of a change in intention or ability or because the tainting period has passed, it becomes appropriate to regard an AFS asset as HTM, it will be reclassified accordingly.

If an AFS asset is reclassified as held-to-maturity, the fair value carrying amount of the financial asset on the date becomes the new amortized cost.

#### Derecognition of Financial Assets and Liabilities

##### *Financial asset*

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognized when:

- a. the right to receive cash flow from the asset has expired;
- b. the Branch retains the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a 'pass-through' arrangement; or
- c. the Branch has transferred its right to receive cash flows from the asset and either (i) has transferred substantially all the risks and rewards of the asset, or (ii) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Branch has transferred its right to receive cash flows from an asset or has entered into a pass-through arrangement, and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognized to the extent of the Branch's continuing involvement in the asset. Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of original carrying amount of the asset and the maximum amount of consideration that the Branch could be required to repay.

##### *Financial liability*

A financial liability is derecognized when the obligation under the liability is discharged, cancelled, or has expired. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in the profit and loss.

### Impairment of Financial Assets

The Branch assesses at each reporting date whether a financial asset or group of financial assets is impaired. A financial asset or a group of financial assets is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset (an incurred 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated. Evidence of impairment may include indications that the borrower or a group of borrowers is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganization and where observable data indicate that there is measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

### *Insurance receivables*

A provision for impairment is made when there is objective evidence (such as the probability of insolvency or significant financial difficulties of the debtor) that the Branch will not be able to collect all of the amounts due under the terms agreed with the counterparty. The carrying amount of the receivable is reduced through the use of an allowance account.

### *AFS financial assets*

For debt instruments classified as AFS financial assets, impairment is assessed based on the same criteria as financial assets carried at amortized cost. Future interest income is based on the reduced carrying amount and is accrued using the rate of interest used to discount future cash flows for the purpose of measuring impairment loss and is recorded in the profit and loss. If, in a subsequent period, the fair value of a debt instrument increased and the increase can be objectively related to an event occurring after the impairment loss was recognized in the profit and loss, the impairment loss is reversed through the profit and loss.

If there is objective evidence that an impairment loss has been incurred, the amount of the loss is measured as the difference between the financial asset's carrying amount and the present value of the estimated future cash flows discounted using the original EIR. The carrying amount of the asset is reduced through the use of an allowance account. The amount of the loss is recognized as "Provision for impairment loss" in the profit and loss.

Interest income continues to be accrued on the reduced carrying amount based on the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss. Loans together with the associated allowance are written off when there is no realistic prospect of future recovery and all collateral, if any, has been realized or has been transferred to the Branch.

If in a subsequent year, the amount of the estimated impairment loss increases or decreases because of an event occurring after the impairment was recognized, the previously recognized impairment loss is increased or reduced by adjusting the allowance account. If a write-off is later recovered, the recovery is recognized in the profit and loss. Any subsequent reversal of an impairment loss is recognized in the profit and loss, to the extent that the carrying value of the asset does not exceed what would have been its amortized cost at the reversal date had there been no impairment.

### *Held-to-maturity investments and Loans and receivables*

For financial assets carried at amortized cost, the Branch first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, or collectively for financial assets that are not individually significant. If the Branch determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses for impairment. Assets that are individually assessed for impairment and for

which an impairment loss is, or continues to be recognized, are not included in a collective assessment for impairment.

The amount of any impairment loss identified is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future expected credit losses that have not yet been incurred). The present value of the estimated future cash flows is discounted at the financial asset's original EIR.

#### Offsetting Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

#### Reinsurance Assets

The Branch cedes insurance risk in the normal course of business. Reinsurance assets represent balances due from reinsurance companies. Recoverable amounts are estimated in a manner consistent with the outstanding claims provision and are in accordance with the reinsurance contract.

An impairment review is performed at each reporting date or more frequently when an indication of impairment arises during the reporting year. Impairment occurs when objective evidence exists that the Branch may not recover outstanding amounts under the terms of the contract and when the impact on the amounts that the Branch will receive from the reinsurer can be measured reliably. The impairment loss is charged to profit or loss.

Ceded reinsurance arrangements do not relieve the Branch from its obligations to policyholders. The Branch also assumes reinsurance risk in the normal course of business for insurance contracts. Premiums and claims on assumed reinsurance are recognized as income and expenses in the same manner as they would be if the reinsurance were considered direct business, taking into account the product classification of the reinsured business. Reinsurance liabilities represent balances due to reinsurance companies. Amounts payable are estimated in a manner consistent with the associated reinsurance contract.

Premiums and claims are presented on a gross basis for both ceded and assumed reinsurance.

Reinsurance assets or liabilities are derecognized when the Branch's contractual right is extinguished or expired or when the contract is transferred to another party.

#### Deferred Acquisition Costs (DAC)

Commission and other acquisition costs incurred during the financial period that vary with and are related to securing new insurance contracts and or renewing existing insurance contracts, but which relates to subsequent financial periods, are deferred to the extent that they are recoverable out of future revenue margins. All other acquisition costs are recognized as an expense when incurred.

Subsequent to initial recognition, these costs are amortized using the 24th method. Amortization is charged against the profit or loss. The unamortized acquisition costs are shown as "Deferred acquisition costs" in the assets section of the statement of financial position.

An impairment review is performed at each end of the reporting period or more frequently when an indication of impairment arises. The carrying value is written down to the recoverable amount and the impairment loss is charged against the profit or loss. The DAC is also considered in the liability adequacy test for each end of the reporting period.

Property and Equipment

Property and equipment are stated at cost less accumulated depreciation and amortization, and any impairment in value.

The initial cost of equipment comprises its purchase price, including any directly attributable costs of bringing the asset to its working condition and location for its intended use. Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Branch and the cost of the item can be measured reliably. All other repairs and maintenance expenses are charged to the statement of comprehensive income during the financial period in which they are incurred.

Depreciation on other property and equipment is provided on a straight-line method over the estimated useful lives (or lease term, if shorter) of each part of an item of property and equipment as follows:

	Years
Equipment	3
Leasehold improvements	3

The estimated useful life and the depreciation and amortization method are reviewed periodically to ensure that the period and the method of depreciation and amortization are consistent with the expected pattern of economic benefits from the equipment.

An item of property and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the item) is included in profit or loss in the year the item is derecognized.

Right-of-use assets

The Branch recognizes right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received and estimate of costs to be incurred by the lessee in dismantling and removing the underlying asset, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease, unless those costs are incurred to produce inventories. Unless the Branch is reasonably certain to obtain ownership of the leased asset at the end of the lease term, the recognized right-of-use assets are depreciated on a straight-line basis over the shorter of its estimated useful life and the lease term of 3 years.

Right-of-use assets are subject to impairment. Refer to the accounting policies in section impairment of non-financial assets.

## Other Assets

### *Prepaid Expenses*

Prepaid expenses pertain to resources controlled by the Branch as a result of past events and from which future economic benefits are expected to flow to the Branch. Prepaid expenses are carried at cost and are amortized on a straight-line basis, over the period of intended usage, which is equal to or less than 12 months or within the normal operating cycle.

### *Value-Added Tax (VAT)*

Revenue, expenses and assets are recognized net of the amount of sales tax except:

- where the tax incurred on a purchase of assets or services is not recoverable from the tax authority, in which case the tax is recognized as part of the cost of acquisition of the asset or as part of the expense item as applicable; and,
- receivables and payables that are stated with the amount of tax included.

The net amount of tax recoverable or payable from the tax authority is included as part of “Other assets” or “Accounts payable and accrued expenses” in the statement of financial position.

### *Creditable Withholding Taxes (CWTs)*

Creditable withholding taxes pertain to the tax paid by the Branch that is withheld by its counterparties for the payment of its expenses and other purchases. These CWTs are initially recorded at cost as an asset under “Other assets” account.

At each end of the tax reporting deadline, these CWTs may either be offset against future tax income payable or be claimed as a refund from the taxation authorities at the option of the Branch.

At each end of the reporting period, an assessment for impairment is performed as to the recoverability of these CWTs.

## Impairment of Nonfinancial Assets

At each reporting date, the Branch assesses whether there is any indication that its nonfinancial assets may be impaired. When an indicator of impairment exists or when an annual impairment testing for an asset is required, the Branch makes a formal estimate of recoverable amount.

Recoverable amount is the higher of an asset’s or cash-generating unit’s (CGU) fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets, in which case the recoverable amount is assessed as part of the CGU to which it belongs. Where the carrying amount of an asset (or CGU) exceeds its recoverable amount, the asset (or CGU) is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset (or CGU). An impairment loss is charged to operations in the year in which it arises.

An assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset’s recoverable amount since the last impairment loss was recognized. If that is the case, the carrying amount of the asset is increased to its recoverable amount.

## Income Tax

### *Current tax*

Current tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that have been enacted or substantively enacted as of the financial reporting date.

### *Deferred tax*

Deferred tax is provided, using the balance sheet liability method, on all temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax liabilities are recognized for all taxable temporary differences, with certain exceptions. Deferred tax assets are recognized for all deductible temporary differences, carry forward of unused net operating loss carryover (NOLCO), to the extent that it is probable that sufficient taxable profit will be available against which the deductible temporary differences and carry forward of NOLCO can be utilized.

The carrying amount of deferred tax assets is reviewed at each reporting date, and reduced to the extent that it is no longer probable that sufficient taxable income will be available to allow all or part of the deferred tax assets to be utilized. Unrecognized deferred tax assets are reassessed at each reporting date and are recognized to the extent that it has become probable that future taxable profit will allow all or part of the deferred tax assets to be recovered.

Current tax and deferred tax relating to items recognized directly in equity or OCI are likewise recognized in equity or OCI.

Deferred tax assets and liabilities are measured at the tax rate that is expected to apply to the period when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantially enacted as of end of the reporting period.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Movements in the deferred tax assets and liabilities arising from changes in the rates are charged against or credited to operations for the period.

## Product Classification

Insurance contracts are defined as those contracts under which the Branch (the insurer) accepts significant insurance risk from another party (the policyholders) by agreeing to compensate the policyholders if a specified uncertain future event (the insured event) adversely affects the policyholder. As a general guideline, the Branch defines significant insurance risk, by comparing benefits paid with benefits payable if the insured event did not occur. Insurance contracts can also transfer financial risk. Financial risk is the risk of a possible future change in one or more of a specified interest rate, security price, commodity price, foreign exchange rate, index of price or rates, a credit rating or credit index or other variable. Investment contracts mainly transfer financial risk but can also transfer insignificant insurance risk.

Once a contract has been classified as an insurance contract, it remains an insurance contract for the remainder of its lifetime, even if the insurance risk reduces significantly during this period, unless all rights and obligations are extinguished or has expired. Investment contracts can however be reclassified as insurance contracts after inception if the insurance risk becomes significant.

#### Insurance Contract Liabilities

Insurance contract liabilities are recognized when contracts are entered into and premiums are charged.

##### *Provision for unearned premiums*

The proportion of written premiums, gross of commissions payable to intermediaries, attributable to subsequent periods or to risks that have not yet expired is deferred as provision for unearned premiums. Premiums from short-duration insurance contracts are recognized as revenue over the period of the contracts using the 24th method, otherwise, 365<sup>th</sup> method is used. The portion of the premiums written that relate to the unexpired periods of the policies at end of the reporting period are accounted for as provision for unearned premiums as part of “Insurance contract liabilities” and presented in the liabilities section of the statement of financial position. The change in the provision for unearned premiums is taken to profit or loss in order that revenue is recognized over the period of risk. Further provisions are made to cover claims under unexpired insurance contracts which may exceed the unearned premiums and the premiums due in respect of these contracts.

##### *Provision for claims reported and incurred but not reported (IBNR) losses*

These liabilities are based on the estimated ultimate cost of all claims incurred but not settled at the end of the reporting period together with related claims handling costs and reduction for the expected value of salvage and other recoveries. Delays can be experienced in the notification and settlement of certain types of claims, therefore the ultimate cost of which cannot be known with certainty at the end of the reporting period. The liability is not discounted for the time value of money and includes provision for IBNR losses. The IBNR is calculated at the reporting date using a range of actuarial projection techniques such as but not limited to the chain ladder method, expected loss ratio method and Bornheutter-Ferguson method. The liability is derecognized when the contract is discharged, cancelled or has expired.

The Branch shall include a margin for adverse deviation (MfAD) to allow for inherent uncertainty of the best estimate of the policy reserves which shall be determined by an independent actuary at least on an annual basis based on standard projection techniques or combination of such techniques such as, but not limited to, the Mack Method, Bootstrapping Method, Stochastic Chain Ladder Method to bring the actuarial estimate of the policy liabilities at the 75% level of sufficiency.

##### *Liability adequacy test*

At each reporting date, liability adequacy tests are performed, to ensure the adequacy of insurance contract liabilities, net of related DAC. In performing the test, current best estimates of future cash flows, claims handling and policy administration expenses are used. Changes in expected claims that have occurred, but which have not been settled, are reflected by adjusting the liability for claims and future benefits. Any inadequacy is immediately charged to profit or loss by establishing an unexpired risk provision for losses arising from the liability adequacy tests. The provision for unearned premiums is increased to the extent that the future claims and expenses in respect of current insurance contracts exceed future premiums plus the current provision for unearned premiums.

Provision for unexpired risk (URR) is the best estimate that relates to expected future claim payments and related expenses to be incurred after the valuation date, arising from future events. This shall be calculated as the best estimate of future claims and expenses for all classes of business, with MfAD.

### Lease liabilities

At the commencement date of the lease, the Branch recognizes lease liabilities measured at the present value of lease payments to be made over the lease term. In calculating the present value of lease payments, the Branch uses the incremental borrowing rate at the lease commencement date if the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the in-substance fixed lease payments or a change in the assessment to purchase the underlying asset.

### *Short-term leases and leases of low-value assets*

The Branch applies the short-term lease recognition exemption to its short-term leases (i.e., lease term ends within 12 months and do not contain a purchase option). It also applies the leases of low-value assets recognition exemption to leases of building pylon signage that is considered of low value. (i.e., below ₱250,000). Lease payments on short-term leases and leases of low-value assets are recognized as expense on a straight-line basis over the lease term.

### Home Office Account

#### *Assigned capital*

Assigned capital represents funds transferred from the Home Office to the Branch including any investments and payments of costs and expenses of the Branch.

#### *Contributed surplus*

Contributed surplus represents funds transferred from the Home Office to the Branch in compliance with the requirement of the IC.

#### *Retained earnings*

Retained earnings represent the cumulative balance of net income or loss of the Branch, net of any dividend distribution.

### Revenue Recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Branch and the revenue can be reliably measured. The Branch assesses its revenue arrangements against specific criteria in order to determine if it is acting as principal or agent. The Branch has concluded that it is acting as a principal in all of its revenue arrangements.

The Branch's revenue comprises mainly of net premiums earned, commission income and interest income which are outside the scope of PFRS 15 (scoped in under PFRS 4 and PFRS 9).

#### *Premiums*

Gross insurance written premiums comprise the total premiums receivable for the whole period of cover provided by contracts entered into during the accounting period and are recognized on the date on which the policy incepts. Premiums include any adjustments arising in the accounting period for premiums receivable in respect of business written in prior periods.

Premiums from insurance contracts with policy duration of exactly one year are recognized as revenue over the period of the contracts using 24<sup>th</sup> method. The 365<sup>th</sup> method was used for recognition of revenue for insurance contracts with policy duration of less than or more than one year. The portion of the premiums written that relate to the unexpired periods of the policies at the end of the reporting period is accounted for as provision for unearned premiums and presented as part of insurance contract liabilities in the liabilities section of the statement of financial position. The related reinsurance premiums ceded that pertain to the unexpired periods at reporting date are

accounted for as deferred reinsurance premiums shown as part of reinsurance assets presented in the assets section of the statement of financial position. The net changes in these accounts between reporting dates are included in the determination of net insurance revenue.

#### *Commission income*

Commissions earned from insurance contracts with policy duration of exactly one year are recognized as revenue over the period of the contracts using 24<sup>th</sup> method. The 365<sup>th</sup> method was used for recognition of revenue for insurance contracts with policy duration of less than or more than one year. The portion of the commissions that relate to the unexpired periods of the policies at end of the reporting period are accounted for as deferred reinsurance commissions and presented in the liabilities section of the statement of financial position.

#### *Interest income*

Interest income is recognized as it accrues.

#### *Survey fee income*

Survey fee income is recognized upon completion of service to conduct onsite survey of the property being insured to assess the quality or risks. The Branch has available in-house survey risk engineers who may perform this service as needed.

#### *Expense Recognition*

Expenses are recognized in the profit and loss when a decrease in future economic benefits related to a decrease in an asset or an increase in a liability has arisen that can be measured reliably. Expenses are recognized in the profit and loss on the basis of a direct association between the costs incurred and the earning of specific items of income; on the basis of systematic and rational allocation procedures when economic benefits are expected to arise over several accounting periods and the associations with income can only be broadly or indirectly determined; or immediately when an expenditure produces no economic benefit or when, and to the extent that, future economic benefits do not qualify, or cease to qualify, for recognition in the statement of financial position as an asset.

#### *Insurance benefits and claims*

Benefits and claims consist of benefits and claims paid to policyholders and changes in the valuation of insurance contract liabilities, except for gross changes in the provision for unearned premiums which are included in net earned premiums. It further includes internal and external claims handling costs that are directly related to the processing and settlement of claims. Insurance claims are recorded on the basis of notifications received.

#### *Commission expense*

Commissions are recognized as expense over the period of the insurance contracts using the 24<sup>th</sup> method for policies with a term of exactly one year, otherwise 365<sup>th</sup> method is used. The portion of the commissions that relates to the unexpired periods of the policies at the end of the reporting period is accounted for as 'Deferred acquisition costs' in the statement of the financial position

#### *General and administrative expenses*

General and administrative expenses constitute costs of administering the business. These are recognized and charged to operations as incurred.

#### Provisions

Provisions are recognized when the Branch has a present obligation (legal or constructive) as a result of a past event, and when it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

#### Foreign Currency Translation

Transactions in foreign currencies are initially recorded at the functional currency rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated using the functional currency rate of exchange ruling at the reporting date. Nonmonetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate as at the date of the initial transaction and are not subsequently restated. All foreign exchange differences are taken to profit or loss, except where it relates to equity securities where gains or losses are recognized directly in OCI, the gain or loss is then recognized net of the exchange component in OCI.

#### Contingencies

Contingent liabilities are not recognized in the financial statements. These are disclosed unless the possibility of an outflow of resources embodying economic benefits is remote. Contingent assets are not recognized in the financial statements but disclosed when an inflow of economic benefits is probable.

#### Events After the Reporting Date

Post year-end events that provide additional information about the Branch's financial position at the reporting date (adjusting events) are reflected in the financial statements. Post year-end events that are not adjusting events are disclosed in the notes to financial statements when material.

---

### 3. **Significant Accounting Judgments, Estimates and Assumptions**

The preparation of the Branch's financial statements in accordance with PFRS requires management to make judgments, estimates and assumptions that affect the amounts reported in the financial statements and related notes. Future events may occur which will cause the assumptions used in arriving at the estimates to change. The effects of any change in estimates are reflected in the financial statements as they become reasonably determinable.

Judgments, estimates and assumptions are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. However, actual outcome can differ from these estimates.

#### Judgments

In the process of applying the Branch's accounting policies, management has made the following judgments, apart from those involving estimates and assumptions, which have the most significant effect on the amounts recognized in the financial statements:

##### *Product classification*

The significance of insurance risk is dependent on both the probability of an insured event and the magnitude of its potential effect. As a general guideline, the Branch defines significant insurance risk as the possibility of having to pay benefits on the occurrence of an insured event that are at least 10% more than the benefits payable if the insured event did not occur.

The Branch has determined that the insurance policies it issues have significant insurance risks and therefore meet the definition of insurance contracts and should be accounted for as such.

*Determining functional currency*

Based on the economic substance of the underlying circumstances relevant to the Branch, the functional currency of the Branch has been determined to be the Philippine Peso. The Philippine Peso is the currency of the primary economic environment in which the Branch operates. It is the currency that mainly influences labor, material and other costs of providing services.

*Impairment of financial assets*

The Branch reviews its insurance receivables and loans and receivables at each end of the reporting period to assess whether an allowance for impairment should be recorded in profit or loss. In particular, judgment by management is required in the estimation of the amount and timing of future cash flows when determining the level of allowance required. Such estimates are based on assumptions about a number of factors and actual results may differ, resulting in future changes to the allowance.

The level of this allowance is evaluated by management on the basis of factors that affect the collectability of the accounts. These factors include, but are not limited to age of balances, financial status of counterparties, payment behavior and known market factors. The Branch reviews the age and status of receivables, and identifies accounts that are to be provided with allowance on a regular basis.

The amount and timing of recorded expenses for any period would differ if the Branch made different judgments or utilized different estimates. An increase in allowance for impairment losses would increase recorded expenses and decrease net income.

The Branch did not recognize any impairment loss for the years 2022 and 2021 on its financial assets since there was no objective evidence that the financial assets are impaired and are found to be recoverable through immediate subsequent collections from policyholders, intermediaries and debtors.

*Determination of lease term of contracts with renewal and termination options – Branch as a lessee*

The Branch applies judgement in evaluating whether it is reasonably certain whether or not to exercise the option to renew or terminate the lease. That is, it considers all relevant factors that create an economic incentive for it to exercise either the renewal or termination. After the commencement date, the Branch reassesses the lease term if there is a significant event or change in circumstances that is within its control and affects its ability to exercise or not to exercise the option to renew or to terminate depending on the terms of the lease agreement if upon mutual agreement of both parties or solely at the option of the lessee.

Estimates and Assumptions

The Branch based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to the market changes or circumstances arising beyond the control of the Branch. Such changes are reflected in the assumptions when they occur. The key assumptions concerning the future and other key sources of estimation uncertainty at the end of reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets within the next financial year are discussed below.

*Impairment of nonfinancial assets*

The Branch assesses impairment on nonfinancial assets whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. The factors that the Branch considers important which could trigger an impairment review include the following:

- significant underperformance relative to expected historical or projected future operating results;
- significant changes in the manner of use of the acquired assets or the strategy for overall business; and
- significant negative industry or economic trends.

The Branch recognizes an impairment loss whenever the carrying amount of an asset exceeds its recoverable amount. Recoverable amounts are estimated for individual assets or, if it is not possible, for the cash-generating unit to which the asset belongs.

The Branch did not recognize any impairment loss on its nonfinancial assets.

*Recognition of deferred tax assets*

Deferred tax assets are recognized for all future tax deductibles to the extent that it is probable that sufficient future taxable income will be available against which the deductible temporary differences can be utilized. Significant management judgment is required to determine the amount of deferred tax assets that can be recognized, based upon the likely timing and level of future taxable income together with future tax planning strategies.

The Branch reviews the carrying amount of deferred tax asset at each reporting date and reduces this to the extent that it is no longer probable that sufficient taxable income will be available to allow all or part of the deferred tax asset to be utilized.

As of December 31, 2022 and 2021, the Company has recognized net deferred tax assets amounting to ₱31.39 million and ₱21.24 million, respectively (see Note 24).

*Claims liability arising from insurance contracts*

For nonlife insurance contracts, estimates have to be made both for the expected ultimate cost of claims reported at the end of the reporting period and for the expected ultimate cost of the IBNR claims at the reporting date. It can take a significant period of time before the ultimate claim costs can be established with certainty and for some type of policies, IBNR claims form the majority of the statement of financial position claims provision. The ultimate cost of outstanding claims is estimated by using a range of standard actuarial claims projection techniques, based on the following methods: the Incurred Chain Ladder/Development Approach (IDA), the Paid Chain Ladder/Development Method (PDA), the Bornhuetter-Ferguson Incurred Approach (BFIA), and the Bornhuetter-Ferguson Paid Approach (BFPA).

The main assumption underlying these techniques is that a Branch's past claims development experience can be used to project future claims development and hence ultimate claims costs. As such, these methods extrapolate the development of paid and incurred losses, average costs per claim and claim numbers based on the observed development of earlier years and expected loss ratios. Historical claims development is mainly analysed by accident years, but can also be further analysed by geographical area, as well as by significant business lines and claim types. Large claims are usually separately addressed, either by being reserved at the face value of loss adjuster estimates or separately projected in order to reflect their future development. In most cases, no explicit assumptions are made regarding future rates of claims inflation or loss ratios. Instead, the

assumptions used are those implicit in the historical claims development data on which the projections are based.

MfAD is estimated using Bootstrapping method to bring the actuarial best estimate of the claim liabilities at the 75th percentile level of sufficiency.

The provision for IBNR losses amounted to ₱104,244,722 and ₱68,935,775 as of December 31, 2022 and 2021, respectively (see Note 13).

---

#### 4. Cash, Cash equivalents and Short-Term Investments

##### *Cash*

This account consists of:

	<b>2022</b>	2021
Cash on hand	<b>₱86,200</b>	₱86,200
Cash in banks	<b>453,809,681</b>	328,116,421
Cash equivalents	<b>436,320,905</b>	277,281,281
	<b>₱890,216,786</b>	₱605,483,902

Cash in banks comprise of current and savings accounts which earn interest at prevailing bank deposit rates. Cash equivalents consist of short-term US Dollar and Philippine Peso cash placements with banks which earn at rates ranging from 0.05% to 5.25% and 0.10% to 3.75% in 2022 and 2021, respectively.

Interest income earned on cash in banks and cash equivalents amounted to ₱4,778,082 and ₱779,830 in 2022 and 2021, respectively (see Note 18).

The net foreign exchange gain on cash and cash equivalents amounted to ₱103,522,100 and ₱20,951,861 in 2022 and 2021, respectively.

---

#### 5. Insurance Receivables

This account consists of:

	<b>2022</b>	2021
Premiums receivable from:		
Agents and brokers	<b>₱1,687,475,409</b>	₱958,003,627
Policyholders	<b>30,821,285</b>	3,113,826
Reinsurance recoverable on paid losses	<b>175,352,228</b>	227,067,219
	<b>₱1,893,648,922</b>	₱1,188,184,672

Premiums receivable arise from unpaid premiums from intermediaries and policyholders.

Reinsurance recoverable on paid losses pertains to the share of ceding companies for the claims already paid to the policyholders by the Branch.

The Branch did not recognize impairment loss on insurance receivables as of December 31, 2022 and 2021 after considering a number of factors which include, but are not limited to age of balances, financial status of counterparties, payment behavior and known market factors.

The net foreign exchange gain on insurance receivables amounted to ₱34,110,079 and ₱26,570,747 in 2022 and 2021, respectively.

## 6. Financial Assets

The Branch's financial assets are summarized by measurement categories as follows:

	2022	2021
AFS financial assets	₱861,184,967	₱736,508,331
Held-to-maturity investments	787,485,081	529,154,860
Loans and receivables	150,776	11,434
	<b>₱1,648,820,824</b>	<b>₱1,265,674,625</b>

The assets included in each of the categories above are detailed as follows:

### a. AFS financial assets

This account consists of:

	2022	2021
<b>Quoted securities</b>		
Corporate bonds	₱717,293,283	₱588,542,737
Government debt securities	143,891,684	147,965,594
	<b>₱861,184,967</b>	<b>₱736,508,331</b>

The carrying values of AFS financial assets have been determined as follows:

	2022	2021
At January 1	₱736,508,331	₱760,171,868
Additions	291,703,573	149,728,212
Maturities	(158,378,764)	(182,011,432)
Foreign exchange gain – net	78,767,197	47,248,718
Premium amortization	(9,649,438)	(6,410,040)
Fair value loss	(77,765,932)	(32,218,995)
At December 31	<b>₱861,184,967</b>	<b>₱736,508,331</b>

The movements of revaluation gain on available-for-sale financial assets follows:

	2022	2021
At January 1	₱34,688,476	₱66,907,471
Change in fair value of AFS financial assets	(77,765,932)	(32,218,995)
At December 31	<b>(₱43,077,456)</b>	<b>₱34,688,476</b>

AFS financial assets earned interest at rates ranging from 2.02% to 4.13% and 2.70% to 4.02% in 2022 and 2021, respectively. Interest income earned from AFS financial assets in 2022 and 2021 amounted to ₱18,541,275 and ₱13,365,283, respectively (see Note 18).

As of December 31, 2022, and 2021, the AFS financial assets denominated in foreign currency amounting to US\$15,345,420 and US\$14,505,619, respectively, were translated using the functional currency rate of exchange ruling at the reporting date.

*b. Held-to-maturity investments*

The following presents the breakdown of HTM investments by contractual maturity dates:

	2022	2021
Due within a year	₱22,049,866	₱37,686,388
Due within two (2) to three (3) years	686,772,279	491,468,472
More than three (3) years	78,662,936	–
	<b>₱787,485,081</b>	<b>₱529,154,860</b>

The rollforward analysis of HTM investments follows:

	2022	2021
At January 1	₱529,154,860	₱634,996,187
Ad Additions	379,819,472	224,919,658
Maturities	(123,000,000)	(328,293,577)
Premium amortization	1,510,749	(6,335,200)
Foreign exchange gain – net	–	3,867,792
At December 31	<b>₱787,485,081</b>	<b>₱529,154,860</b>

HTM investments primarily consist of investment in government securities which are deposited with the Insurance Commission in accordance with the provisions of the Insurance Code (the Code). These deposited government securities serve as security for the benefit of policyholders and creditors of the Branch.

In 2022 and 2021, interest income on these investments, net of premium amortization, amounted to ₱27,757,258 and ₱4,142,975, respectively (see Note 18).

As of December 31, 2022, and 2021, the HTM investments denominated in foreign currency amounting to US\$1,288,742 and US\$1,384,682, respectively, were translated using the functional currency rate of exchange ruling at the reporting date.

*c. Loans and receivables*

Loans and receivables pertain to Branch's cash advances to employees.

## 7. Accrued Income

This account consists of interest receivable on AFS financial assets, HTM investments, cash equivalents and short-term investments as follows:

	2022	2021
Held-to-maturity investments	<b>₱3,665,854</b>	₱3,667,937
Available-for-sale financial assets		
Corporate bonds	<b>6,193,483</b>	3,060,359
Government securities	<b>4,340,971</b>	1,764,736
Cash equivalents	<b>943,832</b>	89,430
	<b>₱15,144,140</b>	₱8,582,462

The net foreign exchange gain on accrued income amounted to ₱573,752 and ₱371,154 in 2022 and 2021, respectively.

## 8. Deferred Acquisition Costs and Deferred Reinsurance Commissions

The rollforward analyses of these accounts follow:

### *Deferred acquisition costs*

	2022	2021
At January 1	<b>₱115,160,641</b>	₱85,627,815
Cost deferred during the year	<b>275,659,134</b>	213,102,392
Amortization during the year recognized as “Commission expense”	<b>(249,121,634)</b>	(183,569,566)
At December 31	<b>₱141,698,141</b>	₱115,160,641

### *Deferred reinsurance commissions*

	2022	2021
At January 1	<b>₱245,899,344</b>	₱159,782,640
Income deferred during the year	<b>541,481,262</b>	364,571,502
Amortization during the year recognized as “Commission income”	<b>(449,461,757)</b>	(278,454,799)
At December 31	<b>₱337,918,849</b>	₱245,899,344

The net foreign exchange (gain) loss on deferred acquisition cost and deferred reinsurance commission amounted to ₱17,226,922 and (₱672,360) in 2022 and 2021, respectively.

## 9. Reinsurance Assets

This account consists of:

	2022	2021
Deferred reinsurance premiums (Note 13)	₱1,502,702,181	₱994,887,284
Reinsurance recoverable on unpaid losses (Note 13)	1,101,494,320	809,013,088
	<b>₱2,604,196,501</b>	<b>₱1,803,900,372</b>

Deferred reinsurance premiums pertain to the unexpired portion of the insurance premiums ceded to reinsurers.

Reinsurance recoverable on unpaid losses represents balances due from reinsurers for their share in insurance contract liabilities in accordance with the respective reinsurance contracts.

The net foreign exchange gain on reinsurance recoverable on unpaid losses amounted to ₱6,998,922 and ₱1,962,964 in 2022 and 2021, respectively.

## 10. Property and Equipment

The rollforward analysis of this account follow:

	2022		Total
	Equipment	Leasehold Improvements	
<b>Cost</b>			
At January 1	₱7,055,041	₱10,895,748	₱17,950,789
Additions	2,080,946	-	2,080,946
At December 31	9,135,987	10,895,748	20,031,735
<b>Accumulated depreciation</b>			
At January 1	4,506,197	10,895,748	15,401,945
Depreciation (Note 20)	1,145,436	-	1,145,436
<b>At December 31</b>	<b>5,651,633</b>	<b>10,895,748</b>	<b>16,547,381</b>
<b>Net Book Value</b>	<b>₱3,484,354</b>	<b>₱-</b>	<b>₱3,484,354</b>
	2021		
	Equipment	Leasehold Improvements	Total
<b>Cost</b>			
At January 1	₱4,162,185	₱10,895,748	₱15,057,933
Additions	2,892,856	-	2,892,856
At December 31	7,055,041	10,895,748	17,950,789
<b>Accumulated depreciation</b>			
At January 1	3,944,542	10,895,748	14,840,291
Depreciation (Note 20)	561,654	-	561,654
At December 31	4,506,197	10,895,748	15,401,945
<b>Net Book Value</b>	<b>₱2,548,845</b>	<b>₱-</b>	<b>₱2,548,845</b>

As of December 31, 2022 and 2021, cost of fully depreciated property and equipment still in use amounted to ₱15,057,932 and ₱14,561,078, respectively.

---

## 11. Intangible asset

In 2020, the Branch entered into a contract with a third-party to develop a new accounting software. The licensing fee and other implementation expenses amounting to ₱1,259,135 and ₱1,037,500, respectively, were capitalized as 'Intangible asset'. In 2022, the Branch entered into a contract with a third-party to develop a new accounting software. The licensing fee and other implementation expenses were capitalized as in 'Intangible asset'. The new accounting software was fully implemented and went live on April 2022. The rollforward analysis of this account follow:

	2022	2021
Cost		
At January 1	₱3,249,135	₱2,296,635
Additions	702,500	952,500
At December 31	3,951,635	3,249,135
Accumulated depreciation		
At January 1	-	-
Depreciation	592,745	-
At December 31	592,745	-
Net Book Value	₱3,358,890	₱3,249,135

---

## 12. Other Assets

This account consists of:

	2022	2021
Security deposit	₱5,727,672	₱5,727,672
Prepaid expenses	4,976,212	5,975,338
Rental deposit	3,942,747	2,711,161
Deferred input VAT	603,114	374,674
	₱15,249,745	₱14,788,845

VAT receivable pertains to Output VAT on premiums written.

Prepaid expenses pertain to prepayments for payroll, IT services, insurance premiums, rental charges and resident agent fees.

Security deposit is the amount deposited by the Branch to the IC as required for all non-life insurance companies authorized to do business in the Philippines.

Rental deposit pertains to deposit made at the inception of the agreement that will be returned after the termination of the related lease.

### 13. Insurance Contract Liabilities

Insurance contract liabilities may be analyzed as follows:

	Insurance contract liabilities	Reinsurers' share of liabilities (Note 9)	Net 2022	Insurance contract liabilities	Reinsurers' share of liabilities (Note 9)	Net 2021
Provision for claims reserves	₱700,949,486	₱608,882,470	₱92,067,016	₱599,584,947	₱523,477,752	₱76,107,195
Provision for IBNR claims and MfAD	596,856,572	492,611,850	104,244,722	354,471,110	285,535,335	68,935,775
Total claims reported,						
IBNR claims and MfAD	1,297,806,058	1,101,494,320	196,311,738	954,056,057	809,013,088	145,042,970
Reserve for unearned premiums	1,623,377,037	1,502,702,181	120,674,856	1,086,820,663	994,887,284	91,933,379
<b>Total insurance contract liabilities</b>	<b>₱2,921,183,095</b>	<b>₱2,604,196,501</b>	<b>₱316,986,594</b>	<b>₱2,040,876,721</b>	<b>₱1,803,900,372</b>	<b>₱236,976,349</b>

Provisions for claims reported by policyholders and IBNR claims may be analyzed as follows:

	Insurance contract liabilities	Reinsurers' share of liabilities (Note 9)	Net 2022	Insurance contract liabilities	Reinsurers' share of liabilities (Note 9)	Net 2021
At January 1	₱954,056,056	₱809,013,088	₱145,042,968	₱978,474,643	₱853,902,471	₱124,572,172
Claims incurred during the year	528,120,734	440,818,363	87,302,371	384,247,760	326,516,503	57,731,257
Claims paid during the year (Note 19)	(426,756,192)	(355,413,645)	(71,342,547)	(430,305,082)	(370,103,934)	(60,201,148)
Increase (decrease) in IBNR and MfAD	242,385,461	207,076,513	35,308,946	21,638,735	(1,301,952)	22,940,688
<b>At December 31</b>	<b>₱1,297,806,058</b>	<b>₱1,101,494,320</b>	<b>₱196,311,738</b>	<b>₱954,056,056</b>	<b>₱809,013,088</b>	<b>₱145,042,970</b>

Reserve for unearned premiums may be analyzed as follows:

	Insurance contract liabilities	Reinsurers' share of liabilities (Note 9)	Net 2022	Insurance contract liabilities	Reinsurers' share of liabilities (Note 9)	Net 2021
At January 1	₱1,086,820,663	₱994,887,285	₱91,933,379	₱768,329,058	₱699,743,876	₱68,585,183
New policies written during the year (Note 17)	2,620,692,062	2,186,615,750	434,076,312	1,799,566,524	1,550,767,552	248,798,972
Premiums earned during the year (Note 17)	(2,084,135,688)	(1,678,800,854)	(405,334,835)	(1,481,074,918)	(1,255,624,143)	(225,450,775)
<b>At December 31</b>	<b>₱1,623,377,037</b>	<b>₱1,502,702,181</b>	<b>₱120,674,856</b>	<b>₱1,086,820,663</b>	<b>₱994,887,285</b>	<b>₱91,933,380</b>

The net foreign exchange loss on insurance contract liabilities amounted to ₱7,343,838 and ₱2,252,212 in 2022 and 2021, respectively.

### 14. Insurance Payables

This account consists of:

	2022	2021
Due to reinsurers:		
Related parties (Note 23)	₱385,631,874	₱245,161,659
Other reinsurers	1,211,183,407	563,757,280
Funds held for reinsurers:		
Related parties (Note 23)	45,250,204	23,685,106
Other reinsurers	56,347,773	64,102,290
	<b>₱1,698,413,258</b>	<b>₱896,706,335</b>

The rollforward analysis of this account follows:

	Due to Reinsurers	Funds Held for Reinsurers	Total
At January 1, 2021	₱761,103,612	₱23,261,313	₱784,364,925
Arising during the year	264,164,484	471,702,316	735,866,800
Utilized	(216,349,158)	(407,176,233)	(623,525,391)
<b>At December 31, 2021</b>	<b>₱808,918,938</b>	<b>₱87,787,396</b>	<b>₱896,706,334</b>
Arising during the year	1,677,451,867	373,722,398	2,051,174,265
Utilized	(889,555,524)	(359,911,817)	(1,249,467,341)
<b>At December 31, 2022</b>	<b>₱1,596,815,281</b>	<b>₱101,597,977</b>	<b>₱1,698,413,258</b>

The net foreign exchange loss on insurance payables amounted to ₱73,339,498 and ₱31,174,927 in 2022 and 2021, respectively.

## 15. Accounts Payable and Accrued Expenses

This account consists of:

	2022	2021
Commissions payable	₱162,846,370	₱104,886,840
Taxes payable	79,204,931	45,023,181
Accrued expenses	57,427,839	21,861,867
Other payables	18,951,709	980,284
	<b>₱318,430,849</b>	<b>₱172,752,172</b>

Commissions payable pertain to unpaid commissions to agents, brokers and ceding companies which are payable upon the collection of the premium based on the Branch's commission disbursement schedule.

Taxes payable refer to VAT payable, documentary stamp tax payable, withholding taxes payable and other taxes and licenses due for settlement within one month after the reporting date.

Accrued expenses pertain to operating expenses of the Branch which are non-interest-bearing and are due within one year.

Other payables consist mainly of unidentified premium remittances directly deposited to the bank account of the Branch which will be reclassified to corresponding accounts once identified, unpaid salaries and wages, and advances to policyholders.

The net foreign exchange loss on accounts payable and accrued expenses amounted to ₱13,769,726 and ₱6,015,780 in 2022 and 2021, respectively.

## 16. Home Office Account

The details of this account follow:

	2022	2021
Statutory deposit	<b>₱1,000,000,000</b>	₱1,000,000,000
Contributed surplus	<b>35,574,928</b>	35,574,928

### *Assigned capital and Contributed surplus*

These accounts represent funds transferred from the Home Office to the Branch including the initial contribution for the required capital of IC, additional investments and payments of pre-operating expenses of the Branch.

## 17. Net Earned Insurance Premiums

This account consists of:

	2022	2021
Gross written premiums on insurance contracts:		
Direct insurance	<b>₱761,931,456</b>	₱496,378,937
Assumed reinsurance	<b>1,858,760,606</b>	1,303,187,587
Total gross premiums written on insurance contracts (Note 13)	<b>2,620,692,062</b>	1,799,566,524
Gross change in reserve for unearned premiums	<b>(536,556,374)</b>	(318,491,606)
Total gross earned premiums on insurance contracts (Note 13)	<b>2,084,135,688</b>	1,481,074,918
Reinsurers' share of gross earned premiums on insurance contracts (Notes 13 and 14)	<b>2,186,615,750</b>	1,550,767,552
Reinsurers' share of gross change in deferred reinsurance premiums	<b>(507,814,896)</b>	(295,143,409)
Total reinsurers' share of gross earned premiums on insurance contracts (Note 13)	<b>1,678,800,854</b>	1,255,624,143
<b>Net earned insurance premiums</b>	<b>₱405,334,834</b>	₱225,450,775

## 18. Interest Income

This account consists of interest earned on:

	2022	2021
Held-to-maturity investments (Note 6)	<b>₱27,757,258</b>	₱4,142,975
Available-for-sale financial assets (Note 6)	<b>18,541,275</b>	13,365,283
Cash and cash equivalents (Note 4)	<b>4,778,082</b>	779,830
	<b>₱51,076,615</b>	₱ 18,288,088

## 19. Insurance Benefits and Claims

Gross insurance benefits and claims paid:

	2022	2021
Direct insurance	<b>₱101,878,764</b>	₱90,201,116
Assumed reinsurance	<b>324,877,428</b>	340,103,966
Total insurance contracts benefits and claims paid (Note 13)	<b>₱426,756,192</b>	₱430,305,082

Reinsurers' share in gross insurance benefits and claims paid:

	2022	2021
Assumed reinsurance	<b>₱312,145,122</b>	₱319,491,554
Direct insurance	<b>43,268,523</b>	50,612,380
Total reinsurers' share of gross insurance contracts benefits and claims (Note 13)	<b>₱355,413,645</b>	₱370,103,934

Gross change in insurance contract liabilities pertaining to claims reported:

	2022	2021
Assumed reinsurance	<b>₱66,020,883</b>	(₱48,106,200)
Direct insurance	<b>35,343,659</b>	(2,048,879)
Total gross change in insurance contract liabilities pertaining to claims reported and IBNR claims (Note 13)	<b>₱101,364,542</b>	(₱46,057,321)

Reinsurers' share in gross change in insurance contract liabilities pertaining to claims reported:

	2022	2021
Assumed reinsurance	<b>(₱67,793,828)</b>	₱46,726,828
Direct insurance	<b>(17,610,890)</b>	(3,139,398)
Total reinsurer's share of gross change in insurance contract liabilities pertaining to claims reported and IBNR claims (Note 13)	<b>(₱85,404,718)</b>	₱43,587,430

Gross change in insurance contract liabilities pertaining to IBNR claims and MfAD:

	2022	2021
Assumed reinsurance	<b>₱211,579,872</b>	(₱16,681,411)
Direct insurance	<b>18,086,385</b>	38,771,196
Total gross change in insurance contract liabilities pertaining to claims reported and IBNR claims (Note 13)	<b>₱229,666,257</b>	₱22,089,196

Reinsurers' share in gross change in insurance contract liabilities pertaining to claims IBNR claims and MfAD:

	2022	2021
Assumed reinsurance	<b>₱209,458,110</b>	₱9,970,717
Direct insurance	<b>(2,381,597)</b>	(9,119,814)
Total reinsurer's share of gross change in insurance contract liabilities pertaining to claims reported and IBNR claims (Note 13)	<b>(₱207,076,513)</b>	₱850,904

## 20. General and Administrative Expenses

This account consists of:

	2022	2021
Salaries, allowances and benefits (Note 23)	<b>₱103,354,598</b>	₱79,117,524
Transportation and travel	<b>56,763,643</b>	22,556,076
Taxes and licenses	<b>9,355,026</b>	10,663,712
Depreciation (Notes 10, 11 and 21)	<b>8,532,603</b>	7,529,213
Professional fees	<b>8,308,124</b>	9,026,349
Survey fees	<b>7,495,618</b>	5,209,350
Entertainment, amusement and recreation	<b>5,273,979</b>	823,050
Subscription fees	<b>4,395,941</b>	2,587,780
Communication, light and water	<b>4,318,749</b>	3,682,215
Rent (Note 21)	<b>2,519,685</b>	1,203,732
Advertising and promotion	<b>2,669,098</b>	2,094,705
Computer expenses	<b>2,171,617</b>	2,346,135
Bank charges	<b>1,872,953</b>	1,615,205
Stationery and supplies	<b>1,063,487</b>	515,476
Custody charges	<b>491,579</b>	373,076
Insurance	<b>51,733</b>	45,739
Recruitment Fee	<b>12,550</b>	-
Miscellaneous	<b>319,630</b>	735,041
	<b>₱218,970,613</b>	₱150,124,379

Miscellaneous expenses consist mainly of express services charges and penalties.

## 21. Lease Commitments

The existing lease contract of the Branch expired on June 19, 2022. The Branch renewed the contract with the same term— three-year lease contract which commenced on June 20, 2022 and will end on June 19, 2025.

In addition to this, the Branch also entered into a new lease contract for its office extension that commenced on November 20, 2022 and will expire on June 19, 2025.

The Branch also has also entered a lease contract for the building pylon signage with low value. The Branch applies the 'lease of low-value assets' recognition exemption for this lease.

The rollforward analysis of right-of-use assets on office space follows:

	2022	2021
<b>Cost</b>		
At beginning and end of year	₱20,902,677	₱20,902,677
Additions	21,311,996	-
Disposals	(20,902,677)	-
At end of year	21,311,996	20,902,677
<b>Accumulated Depreciation</b>		
At beginning of year	17,624,927	10,657,368
Depreciation	6,794,421	6,967,559
Disposals	(20,902,678)	-
At end of year	3,516,670	17,624,927
<b>Net Book Value at end of year</b>	<b>₱17,795,326</b>	<b>₱3,277,750</b>

The rollforward analysis of lease liabilities follows:

	2022	2021
Balances at beginning of year	₱5	₱7,620,824
Additions	21,311,997	-
Accretion of interest	132,568	466,343
Cash payments	(4,451,963)	(8,087,162)
<b>As at December 31</b>	<b>₱16,992,607</b>	<b>₱5</b>

The following are the amounts recognized in the statements of comprehensive income:

	2022	2021
Depreciation expense of right-of-use assets	₱6,794,421	₱6,967,559
Interest expense on lease liabilities	132,568	466,343
Expenses relating to short term leases and leases of low-value assets (Note 20)	2,519,685	1,203,732
Total amount recognized in the statements of comprehensive income	<b>₱9,446,674</b>	<b>₱8,637,634</b>

Shown below is the maturity analysis of the undiscounted lease payments:

	2022	2021
Within 1 year	₱7,393,182	₱-
More than 1 year to 2 years	9,893,946	-

## 22. Pension Benefit Obligation

Pension benefit obligation pertains to the Branch's actuarial estimated liabilities for the employees' retirement plan as of December 31, 2022. The Branch accrues the minimum retirement benefit provided under Republic Act (R.A.) No. 7641 or the "Retirement Pay Law".

Retirement benefit costs have been determined actuarially using the projected unit credit method. Under this method, retirement benefit costs include current service cost, interest cost and the amount recognized in the current period related to past service cost. Under this calculation, the normal

retirement age is 60 years with the completion of at least five (5) years of service. Normal retirement benefit is equivalent to 1-month final salary of employee as at the date of retirement multiplied by years of service.

As at December 31, 2022 and 2021, retirement liability shown in the statements of financial position consists of the present value of net defined benefit obligation.

The rollforward analysis of this account follows:

	2022	2021
At January 1	₱12,152,488	₱11,673,464
Interest expense	585,094	357,091
Current service cost	2,436,359	2,470,583
Actuarial gain (loss) on obligation arising from changes in:		
Demographic assumptions	614,175	743,831
Financial assumptions	(2,311,784)	(3,508,143)
Experience adjustments	700,785	415,662
At December 31	₱14,177,117	₱12,152,488

The principal actuarial assumptions used to determine retirement benefit cost for the Branch as at December 31, 2022 and 2021 are shown below:

	2022		2021	
	January 1	December 31	January 1	December 31
Discount rate	4.81%	6.85%	3.06%	4.81%
Salary increase rate	3.000%	4%	3.000%	3.000%
	2009 - 2014	2009 - 2014	2009 - 2014	2009 - 2014
Mortality	PICM	PICM	PICM	PICM

Shown below is the maturity analysis of the undiscounted benefit payments as of December 31, 2022:

Plan Year	2022	2021
One to less than five years	₱2,342,155	₱2,024,067
Five to less than 10 years	9,059,416	6,234,053
10 to less than 15 years	5,657,897	1,473,571
15 years and above	10,903,296	9,079,783

The weighted average duration of the defined benefit obligation is 10 years as at December 31, 2022.

The defined benefit obligation exposes the Branch to actuarial risks, such as longevity risks and interest risks.

#### Funding Arrangements

The Branch does not have a formal retirement plan, thus benefit claims under the retirement obligation are paid directly by the Branch when they become due.

#### Asset-Liability Matching

The Branch does not have a formal retirement plan and therefore has no plan assets to match against the liabilities under the retirement obligation.

## 23. Related Party Transactions

Parties are related if one party has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions and the parties are subject to common control or common significant influence. Related parties may be individuals or corporate entities.

Outstanding balances as of reporting date are unsecured and settlements are made in cash. There have been no guarantees received for the related party receivables. For the years ended December 31, 2022 and 2021, the Branch has not made any provision for doubtful accounts relating to amounts owed by related parties. This assessment is undertaken each financial year through examination of the financial position of each related party and the market in which the related party operates.

### 2022

<u>Related Party</u>	<u>Amount of Transactions</u>	<u>Outstanding Balance</u>	<u>Terms</u>	<u>Conditions</u>
Insurance payables				
<i>Due to reinsurers (a)</i>				
Starr Insurance & Reinsurance Limited	₱136,546,229	₱369,421,597	due and demandable; non-interest-bearing	Unsecured
Starr Marine Agency	4,049,035	15,604,181	due and demandable; non-interest-bearing	Unsecured
Starr Indemnity & Liability Company - New York	(125,050)	606,096	due and demandable; non-interest-bearing	Unsecured
<i>Funds held for reinsurers (b)</i>				
Starr Insurance & Reinsurance Limited	21,565,098	45,250,204	due and demandable; non-interest-bearing	Unsecured

### 2021

<u>Related Party</u>	<u>Amount of Transactions</u>	<u>Outstanding Balance</u>	<u>Terms</u>	<u>Conditions</u>
Insurance payables				
<i>Due to reinsurers (a)</i>				
Starr Insurance & Reinsurance Limited	(₱3,483,171)	₱232,875,368	due and demandable; non-interest-bearing	Unsecured
Starr Marine Agency	9,065,986	11,555,146	due and demandable; non-interest-bearing	Unsecured
Starr Underwriting Agents Ltd	(1,712,003)	–	due and demandable; non-interest-bearing	Unsecured
Starr Indemnity & Liability Company - New York	410,145	731,146	due and demandable; non-interest-bearing	Unsecured
<i>Funds held for reinsurers (b)</i>				
Starr Insurance & Reinsurance Limited	15,465,512	23,685,106	due and demandable; non-interest-bearing	Unsecured
Starr Managing Agents			due and demandable; non-interest-bearing	Unsecured

(a) Pertains to insurance payable for premiums ceded out by the Branch (see Note 14).

(b) Pertains to premiums withheld by the Branch (see Note 14).

Key management personnel of the Branch include all management committee officers. The remuneration of the key management personnel of the Branch amounted to ₱44,643,680 and ₱39,943,945 in 2022 and 2021, respectively.

## 24. Income Tax

Under Philippine tax laws, the Branch is subject to percentage and other taxes, as well as income taxes. Percentage and other taxes paid consist principally of withholding taxes and VAT.

On March 26, 2021, the Philippines Republic Act (RA) 11534 or the CREATE Act was signed into law and become effective on April 11, 2021.

The CREATE Act:

- Reduced regular corporate income tax (RCIT) rate to 25% effective July 1, 2020.
- Reduced minimum corporate income tax (MCIT) rate to 1% of gross income effective July 1, 2020 to June 30, 2023 and reverting to 2% thereafter.
- Repealed imposition of improperly accumulated earnings tax.

An MCIT on gross income is computed and compared with RCIT. Any excess of the MCIT is deferred and can be used as a tax credit against future income tax liability for the next three (3) years. In addition, NOLCO, is allowed as a deduction from taxable income in the next three (3) years from the date of inception.

Provision for (benefit from) income tax consists of the following:

	2022	2021
Current	₱99,205,880	₱45,286,394
Final	6,916,579	1,405,385
Deferred	2,687,029	430,679
	<b>₱108,809,488</b>	<b>₱47,122,458</b>

Deferred tax assets are recognized only to the extent probable that the Branch's future taxable income will be available against which the deferred tax assets can be used. The Branch reassessed the unrecognized deferred tax assets on the deductible temporary differences and recognized deferred tax assets to the extent that it has become probable that future taxable income would allow the deferred tax assets to be recovered. The Branch has no unrecognized deferred tax assets as of December 31, 2022 and 2021.

Deferred tax assets and liabilities of the Branch follow:

	2022	2021
Deferred tax assets:		
Provision for IBNR and MfAD	₱26,061,181	₱17,233,943
Unrealized foreign exchange loss	25,625,737	-
Pension benefit obligation	3,544,279	3,038,122
Accrued expenses	3,429,927	818,224
Straight-line adjustment on rent	769,945	151,188
Total deferred tax assets	<b>59,431,069</b>	<b>21,241,477</b>

(Forward)

	2022	2021
Deferred tax liabilities:		
Unrealized foreign exchange gain	₱50,277,657	₱9,401,037
Total deferred tax liabilities	50,277,657	9,401,037
Net deferred tax assets	₱9,153,412	₱11,840,440

The reconciliation of the income tax expense computed based on the pre-tax income at the statutory income tax rate to the provision for income tax in the statements of comprehensive income follows:

	2022	2021
Income tax expense at statutory income tax rate	₱108,363,002	₱44,947,259
Tax effects of:		
Impact of CREATE	–	2,050,270
Nontaxable interest income	(4,411,201)	(3,341,321)
Interest income subjected to final tax	(3,704,917)	(1,293,506)
Nondeductible expenses	8,562,604	4,759,756
Provision for income tax	₱108,809,488	₱47,122,458

## 25. Management of Capital, Insurance and Financial Risks

### Governance Framework

The Branch has established a risk management function with clear terms of reference and with the responsibility for developing policies on market, credit, liquidity, insurance and operational risk. It also supports the effective implementation of policies at the individual business unit level.

The policies define the Branch's identification of risk and its interpretation, limit structure to ensure the appropriate quality and diversification of assets, alignment of underwriting and reinsurance strategy to the corporate goals and specify reporting requirements.

### Capital Management Framework

The Branch maintains a certain level of capital to ensure sufficient solvency margins and to adequately protect the policyholders. The level of capital maintained is higher than the minimum net worth requirements set by the IC.

To ensure compliance with these externally imposed capital requirements, it is the Branch's policy to monitor the regulatory requirements of the IC on a quarterly basis as part of the Branch's internal financial reporting process.

As of December 31, 2022 and 2021, the Branch fully complied with the externally imposed net worth requirement during the reported financial periods. These are the minimum net worth requirement and the RBC2 requirement.

### Minimum Statutory Net worth

On August 5, 2013, the President of the Philippines approved Republic Act No. 10607 to be known as the "New Insurance Code" which provides the new capitalization requirements for all existing insurance companies based on net worth on a staggered basis starting June 30, 2013 up to December 31, 2022.

On January 13, 2015, the IC issued Circular Letter No. 2015-02-A clarifying the minimum capitalization and net worth requirements of new and existing insurance companies in the Philippines. Net worth shall include the Branch's paid-up capital, retained earnings, unimpaired surplus, revaluation of assets and shall be reduced by the cost of treasury shares. For foreign branches, the trusted surplus consists of statutory deposit, home office inward remittances and home office account.

The minimum net worth requirement must remain unimpaired for the continuance of the license and shall increase to the amounts as follows:

<b>Networth</b>	<b>Compliance Date</b>
₱250,000,000	June 30, 2013
550,000,000	December 31, 2016
900,000,000	December 31, 2019
1,300,000,000	December 31, 2022

The said circular supersedes the Department Order Nos. 27-06, *Capitalization Requirements for Life, Non-life and Reinsurance Companies* and 15-2012, *Minimum Paid-Up Capital Requirements* and CL Nos. 22-2008, *Unimpaired Capital Requirements* and 26-2008, *Implementation of Department Order No. 27-06*.

The Branch's estimated net worth amounted to ₱1,910,896,696 and ₱1,569,575,074 as of December 31, 2022 and 2021, respectively.

The Branch's estimated non-admitted assets as of December 31, 2022 and 2021 amounted to ₱145,706,291 and ₱123,414,465, respectively.

#### Risk-based capital requirements

Pursuant to CL no. 2017-15, effective January 1, 2017, non-life insurance companies are required to maintain the minimum RBC2 requirement as prescribed under CL No. 2016-68, *Amended Risk-Based Capital (RBC2) Framework*. Under the RBC2 framework, the RBC2 ratio shall be calculated as total available capital divided by the RBC2 requirement. Failure to meet the minimum RBC ratio shall subject the insurance company to corresponding regulatory intervention which has been defined at various levels. The final RBC2 ratio can be determined only after the accounts of the Branch have been examined by the IC.

The following table shows the RBC2 ratio as of December 31, 2022 and December 31, 2021 as determined by the Branch based on the RBC2 framework:

	<b>2022 (Estimate)</b>	2021 (Actual)
Net worth	<b>₱1,910,896,696</b>	₱1,569,575,074
RBC2 requirement	<b>515,561,302</b>	273,922,351
RBC2 Ratio	<b>371%</b>	573%

The RBC2 ratio was determined by the Branch following the requirements of IC CL 2016-68.

The final amount of the RBC2 ratio can be determined only after the accounts of the Branch have been examined by the IC, particularly with respect as to determination of admitted and non-admitted assets.

### Insurance Risk

The risk under insurance contract is the possibility of occurrence of insured event and uncertainty of the amount and timing of the resulting claim. The principal risk the Branch faces under such contracts is that the actual claims and benefit payments exceed the carrying amount of insurance liabilities. This is influenced by the frequency of claims, severity of claims and actual benefits paid are greater than originally estimated.

The variability of risks is improved by diversification of risk of loss to a large portfolio of insurance contracts as a more diversified portfolio is less likely to be affected across the board by change in any subset of the portfolio. The variability of risks can also be improved by careful selection and implementation of underwriting strategy and guidelines.

The business of the Branch mainly comprises of short-term nonlife insurance contracts, specifically accident and health and casualty insurance transactions which are incidental to nonlife insurance contracts.

### *Key Assumptions*

The principal assumption underlying the estimates is the Head Office's past claims development experience. This includes assumptions in respect of average claim costs, claims handling costs, claims inflation factors and number of claims for each accident year. Judgment is used to assess the extent to which external factors such as judicial decisions and government legislation affect the estimates.

Other key assumptions include variations in interest, delays in settlement and changes in foreign currency rates.

### *Sensitivities*

The claims reported and IBNR claims is sensitive to the above key assumptions. Because of delays that arise between occurrence of a claim and its subsequent notification and eventual settlement, the outstanding claim provisions are not known with certainty at the reporting dates.

The analysis is performed for reasonably possible movements in key assumptions with all other assumptions held constant, showing the impact on gross and net liabilities and income before income tax. The correlation of assumptions will have a significant effect in determining the ultimate claims liabilities, but to demonstrate the impact due to changes in assumptions, assumptions had to be changed on an individual basis. It should be noted that movements in these assumptions are nonlinear.

	<b>2022</b>		
	<b>Change in Assumptions</b>	<b>Increase on Net Insurance Contract Liabilities</b>	<b>Impact on Income Before Income Tax</b>
<b>Average claim cost</b>	<b>-2%</b>	<b>(1,556,940)</b>	<b>1,556,940</b>
<b>Average number of claims</b>	<b>9%</b>	<b>7,786,956</b>	<b>(7,786,956)</b>
	<b>2021</b>		
	<b>Change in Assumptions</b>	<b>Increase on Net Insurance Contract Liabilities</b>	<b>Impact on Income Before Income Tax</b>
Average claim costs	6%	₱2,736,911	(₱2,736,911)
Average number of claims	5%	2,054,304	(2,054,304)

Average claim costs and number of claims used for valuation are selected with consideration for statutory requirements, as specified in the Code.

The method used for deriving sensitivity information and significant assumptions did not change from the previous period.

*Claims development table*

The following tables reflect the cumulative incurred claims, including both claims notified and claim IBNR, for each successive accident year at each statement of financial position date, together with cumulative payments to date.

Gross Insurance Contract Liabilities for 2022							
Accident year	2017	2018	2019	2020	2021	2022	Total
<b>Estimate of ultimate claim costs</b>							
at the end of accident year	₱289,097,067	₱285,343,942	₱826,910,230	₱377,153,444	₱299,519,461	₱200,465,523	₱200,465,523

<b>Liability recognized in the statements of financial position</b>	<b>₱12,176,537</b>	<b>₱46,165,817</b>	<b>₱30,956,188</b>	<b>₱20,263,876</b>	<b>₱41,016,475</b>	<b>₱45,732,845</b>	<b>₱196,311,738</b>

Financial Instruments

Due to short-term nature of cash, insurance receivables, accounts receivable, accrued income, reinsurance recoverable on unpaid losses, security and rental deposits, accounts payable, accrued expenses, the carrying values approximate fair values as of reporting date.

The fair value of AFS financial assets that are actively traded in organized financial markets is determined by reference to quoted market prices, at the close of business on the end of the reporting period.

Fair Value Hierarchy

The Branch considers its quoted AFS financial assets amounting to ₱933,509,168 and ₱736,508,331 as of December 31, 2022 and 2021, respectively, under Level 2 classification. The Branch invests in government securities and corporate bonds which are based on observable inputs, such as quoted prices for similar assets at the measurement date. Thus, these government securities and corporate bonds were classified as Level 2. There are no AFS financial assets which have been classified under the Level 3 category. During the reporting periods ended December 31, 2022 and 2021, there were no transfers between Level 1 and Level 2 fair value measurements and no transfers into and out of Level 3 fair value measurement.

### Financial Risk

The Branch is exposed to financial risk through its financial assets and financial liabilities and insurance liabilities. In particular, the key financial risk that the Branch is exposed to is that the proceeds from its financial assets are not sufficient to fund the obligations arising from its insurance contracts. The most important components of this financial risk are credit risk, liquidity risk and market risk. These risks arise from open positions in interest rate, currency and equity products, all of which are exposed to general and specific market movements.

#### *Credit risk*

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss.

Prior to extending credit, the Branch manages its credit risk by assessing the credit quality of its counterparty. The Branch reviews all information about the counterparty and nature of the obligation is likewise considered. Based on this analysis, the credit analyst assigns the counterparty a credit rating to determine whether or not credit may be provided.

Credit risk limit is also used to manage credit exposure which specifies credit limit for each intermediary depending on the size of its portfolio and its ability to meet its obligation based on past experience.

The Branch does not hold any collateral held as security and other credit enhancements on its financial assets as of December 31, 2022 and 2021. Therefore, the Branch's maximum exposure to credit risk is equal to the carrying amount of its financial assets as of December 31, 2022 and 2021.

The table below provides information regarding the credit risk exposure of the Branch by classifying assets according to the Branch's credit ratings of counterparties:

### 2022

	Investment Grade	Non-investment Grade	Total
<b>Loans and receivables</b>			
Cash and cash equivalents*	₱890,130,586	₱—	₱890,130,586

	<b>₱2,688,656,443</b>	<b>₱1,196,623,505</b>	<b>₱3,885,279,948</b>

\*excluding cash on hand

The Branch uses a credit rating concept based on the borrowers' and counterparties' overall creditworthiness, as follows:

- Investment grade - Rating given to counterparties who possess strong to very strong capacity to meet their obligations
- Non-investment grade - Rating given to counterparties who possess above average capacity to meet their obligations.

The tables below show the analysis of age of financial assets that are past-due but are not impaired.

2022

	Neither past due nor impaired	Past due but not impaired		Past due and Impaired	Total
		1 to 90 days	More than 91 days		
Insurance receivables	₱1,765,395,747	₱106,183,178	₱20,668,048	₱-	₱1,892,246,973

2021

	Neither past due nor impaired	Past due but not impaired		Past due and Impaired	Total
		1 to 90 days	More than 91 days		
Insurance receivables	₱1,175,654,881	₱12,529,791	₱-	₱-	₱1,188,184,672

The standard credit term given by the Branch is 90 days. However, the Branch is also extending the credit terms for accounts with reciprocal business and accounts involving bigger amount of sum insured.

*Liquidity risk*

Liquidity or funding risk is the risk that an entity will encounter difficulty in raising funds to meet commitments as they fall due. Liquidity risks may result from either the inability to sell financial assets quickly at their fair values; the counterparty failing to repay a contractual obligation; insurance liabilities falling due for payment earlier than expected; or inability to generate cash inflows as anticipated.

The Branch may suffer from a liquidity problem when its credit rating falls. The Branch is also exposed to liquidity risk if markets on which it depends on are subject to loss of liquidity. The major liquidity risk confronting the Branch is the potential daily calls on its available cash resources in respect of claims arising from insurance contracts.

The Branch manages liquidity through a liquidity risk policy identifying the following: specifies minimum proportion of funds to meet emergency calls; sets up policies on contingency funding plans; specifies the sources of funding and the events that would trigger the plan as well as concentration of funding sources; requires reporting of liquidity risk exposures and breaches to the monitoring authority; and calls for monitoring of compliance with liquidity risk policy and review of liquidity risk policy.

*Maturity Profiles*

The table below analyzes assets and liabilities of the Branch into their relevant maturity group based on the remaining period at the reporting date to their contractual maturities or expected repayment dates:

**2022**

	On demand	Up to a year	1-3 years	More than 3 years	Total

Market risk

Market risk is the risk of change in fair value of financial instruments from fluctuation in foreign exchange rates (currency risk), market interest rates (interest rate risk) and market prices (price risk), whether such change in price is caused by factors specific to the individual instrument or its issuer or factors affecting all instruments traded in the market.

The Branch manages market risk by evenly distributing capital among investment instruments, sectors and geographical areas.

*Currency risk*

Currency risk is the risk that the value of the financial instrument will fluctuate because of changes in foreign exchange rates. The Branch's principal transactions are carried out in Philippine Peso and its exposure to foreign exchange risk arises primarily with respect to the deposits and investments denominated in US Dollar (US\$).

The following table shows the Branch's exposure to currency risk as of December 31, 2021 and 2020:

	2022 <sup>1</sup>		2021 <sup>1</sup>	
	US\$	PHP	US\$	PHP
<b>Assets</b>				
Cash	10,871,690	₱610,119,243	6,054,742	₱307,423,461
AFS financial assets	15,345,420	861,184,967	13,831,486	702,279,867

Insurance receivables	25,101,980	1,408,723,118	14,476,021	735,005,480
Reinsurance recoverable on unpaid losses	10,798,616	606,018,330	11,768,844	565,328,177
	<b>63,406,448</b>	<b>3,558,369,859</b>	<b>47,481,691</b>	<b>2,278,975,831</b>

Forward

	2022 <sup>1</sup>		2021 <sup>1</sup>	
	US\$	PHP	US\$	PHP
<b>Liabilities</b>				
Insurance contract liabilities	12,309,800	690,825,969	14,177,666	681,038,364
Insurance payables	22,759,885	1,277,284,771	10,954,100	526,191,141
Accounts payable and accrued expenses	2,164,998	121,499,670	1,600,444	76,878,940
	<b>37,234,683</b>	<b>2,089,610,410</b>	26,732,210	1,284,108,445
<b>Net exposure</b>	<b>26,171,765</b>	<b>1,468,759,449</b>	20,749,481	994,867,386

<sup>1</sup> The exchange rate used was ₱56.12 and ₱50.77 to US\$1 for years 2022 and 2021, respectively. Third currencies are converted to USD.

The analysis below is performed for reasonably possible movements in US\$ exchange rate as of December 31, 2022 with all other variables held constant, showing the impact on income before income tax. There is no other impact on the Branch's equity other than those already affecting the profit and loss.

### 2022

Currency	Change in exchange rate	Impact on income before tax Increase(decrease)
US\$	+2.19%	₱32,133,770
	-2.19%	(32,133,770)

### 2020

Currency	Change in exchange rate	Impact on income before tax Increase (decrease)
US\$	+1.38%	₱16,031,657
	-1.38%	(16,031,657)

Reasonably possible movements in foreign exchange rates are computed based on average percentage changes in closing rate for twelve (12) months.

### *Interest rate risk*

Interest rate risk is the risk that the value/future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The following table sets out the Branch's financial instruments exposed to interest rate risk by maturity as of December 31, 2022 and 2021:

### 2022

	Range of interest rate	1-3 years	3-5 years	Total
<b>AFS financial assets</b>				
Corporate bonds	1.280% to 4.130%	₱203,107,186	₱514,186,096	₱717,293,282
